Full-stack Development, UI/UX, Mobile App Development, Software Engineering, Networking, Data Analytics, Cloud Systems, Database Management, AWS, Apache Kafka

TECHNICAL SKILLS

Languages and Technologies: Python, C++ , JavaScript, SQL, C sharp, .NET framework, Git, Node, React

PROJECTS

Hex Game - Java

Hex is a two-player abstract strategy game that requires players to create a connected path of their pieces from one side of the hexagonal board to the opposite side. Implementing Hex in Java provides an excellent opportunity to explore fundamental object-oriented programming concepts such as classes, objects, inheritance, and encapsulation. This project aims to create a playable Hex game in Java while adhering to basic object-oriented paradigms.

Smart Home Automation System Using Cisco Packet Tracer

The advent of Internet of Things (IoT) has revolutionized the concept of smart homes, offering homeowners convenience, security, and energy efficiency. Smart home automation systems integrate various devices and technologies to enable remote monitoring and control of household appliances and systems. This project aims to design and simulate a smart home automation system using Cisco Packet Tracer, a network simulation tool, to demonstrate the functionalities and benefits of IoT in a domestic environment.
